

Company Description

Aegis Therapies is one of the leading contract rehabilitation providers in the country, with over 7,000 employees and therapists in more than 1,000 skilled nursing facilities, assisted living, hospitals and other care centers across the nation. This leadership position provides unique advantages for customers including quick, consistent and comprehensive access to resources.

Competitive strengths include unparalleled outcomes measurement and validation, our Freedom Through Functionality proprietary strength-training program, and the "Restore-Compensate-Adapt" (RCA) model of care where Aegis therapists focus not only on restoring a patient's capabilities, but on helping patients adapt to their conditions or compensate for a loss in mobility when complete restoration is not possible.

We have specialty programs in rehab for dementia patients, balance and falls prevention, continence management, pain management and complex disease management. We partner with skilled nursing facilities to establish Orthopedic Centers of Excellence that provide specialized rehabilitation and a unique opportunity to establish a new patient flow. We partner with independent and assisted living centers to bring skilled therapy and health promotion and wellness programs to their residents.

Geographic Area Served: U.S. Only

Segments Served: SNF, AL, IL, CCRC

2010/2011 Product & Service Innovations

- **EnerG by Aegis™:** A set of wellness products and services that educate seniors about common health conditions and address the six dimensions of wellness: emotional, spiritual, social, intellectual, physical and occupational.
- **Freedom Through Functionality:** An expanded version of our strength-training program.
- **Geriatric Enhanced Modalities (GEM) Program:** A modalities-based program to enhance treatment of pain, edema, and muscle re-education.

Suggested Consultative Discussions

- **Improve Resident Outcomes:** We'll share case studies with you on how we measure specific resident outcomes and examples of how you can use those outcomes to your advantage.
- **Learn how to increase census and establish new patient referrals.**
- **How to have a positive impact on clinical quality and facility operations:** Discover how we can help you improve your quality indicators and quality measures, and position your facility as the rehab provider of choice in your market.
