

# Dart Chart Systems

## Company Description

Dart Chart Systems - MDS 3.0 and RUGS IV compatible - is the only creator of a web-based documentation and reimbursement technology expert system to guarantee improved rightful reimbursements for long term care facilities accepting Medicare.

Dart Chart improves client revenue an average \$295,000 per year net of fees with defensible accuracy and audit trails. Dart Chart's legendary Customer Service and Training combine with its user-friendly, role-based charting technology to conquer MDS complexity. Staff morale and retention also improve, along with revenue.

Award-winning DartVoice-9-OV™ technology can facilitate a \$35 to \$75 per patient gains through improved interview efficiency. Nurses, CNAs and therapists can easily conduct appropriate PHQ-9 and PHQ-OV patient interviews without jeopardizing rightful reimbursement.

DartVoice™ works by demystifying complex MDS 3.0 language, helping to alleviate time constraints, justifying interviews and helping interviewers by posing the questions for them. Questions are asked precisely as required by MDS 3.0. DartVoice™ not only improves interview efficiency, it provides the best available training for MDS 3.0 scripted interviews.

Dart Chart is a Long-Term Living Magazine Innovative Products award recipient.

**Geographic Area Served:** U.S. Only

**Segments Served:** SNF

## 2010/2011 Product & Service Innovations

- **Dart Chart's DartVoice™, and DartVoice 9-OV™ technology is MDS 3.0 and RUGS IV compatible**, alleviating loss due to disqualified concurrent therapy minutes while outputting defensible accuracy and bullet-proof audit trails.

## Suggested Consultative Discussions

- **Optimizing Reimbursement through Documentation Compliance:** We'll share best practices and metrics derived from clients who have implemented this approach to charting and documentation.
- **Optimized Reimbursement Demonstration:** Utilization of your own financial information to determine your organization's potential for improved, defensible Medicare reimbursement levels.
- **Understanding the RAC Program** and its impact on Skilled Nursing.
