

MobileCare 2U

Company Description

MobileCare 2U provides on-site dental care focused toward Medicaid residents. Access and benefits are a constant struggle for long term care residents. Our dentists go directly to the facility, so patients are treated in the comfort of familiar surroundings. They bring special portable equipment that is used inside your facility.

The dentist will perform an initial examination to determine what care is needed, then prepare an individual treatment plan. MobileCare 2U provides a wide range of dental services. In addition to evaluations, our licensed mobile dental team's covered services provide cleanings, extractions, fillings and dentures all in the facility (some treatment may need to be performed in a dentist/oral surgeon office or hospital if deemed medically necessary). Progress notes keep you and the resident's family informed. Another important benefit for the facility is the elimination of individual fee for service authorization and pre-approval for dental services for our policyholders.

In addition to superior dental care delivered at your facility, dental procedures are not subject to the arbitrary limitations of state Medicaid programs, and can be funded by the income adjustment process.

Geographic Area Served: IL, MO, KS, IN, OK, TX with many states being added in the future.

Segments Served: SNF

2010/2011 Product & Service Innovations

- **Partnerships with National LTC Providers:** MC2U is interested in partnering with national LTC companies that may have specific needs for mobile, onsite services at no cost to the facility and funded by the income adjustment process.
- **Expanded Service Portfolio:** MC2U is expanding its services portfolio to vision and audiology and participates in a partnership to provide podiatry.
- **Improved Denture Service:** MC2U owns their own denture lab which allows for better fittings and quicker turnaround.

Suggested Consultative Discussions

- **Deliver Dental Care at No Cost to Your Facility:** We'll show you over 500 case studies on how our clients use income adjustments to deliver necessary care without any expense or transportation for the facility.
- **Providing Regular Dental Treatment to Residents:** Learn how our patients receive regular cleanings, fittings and other necessary dental procedures inside the facility where they reside with no deductibles. Medicaid reimburses the entire premium/services for qualified Medicaid recipients.
